TOTAL BREAST TRAINING

Multiplanar Mastopexy with L-Scar under Dr. Adel Bark, and an exclusive seat in the OR with Dr. Alfredo Hoyos as he performs his signature HD2 Lipo procedures.

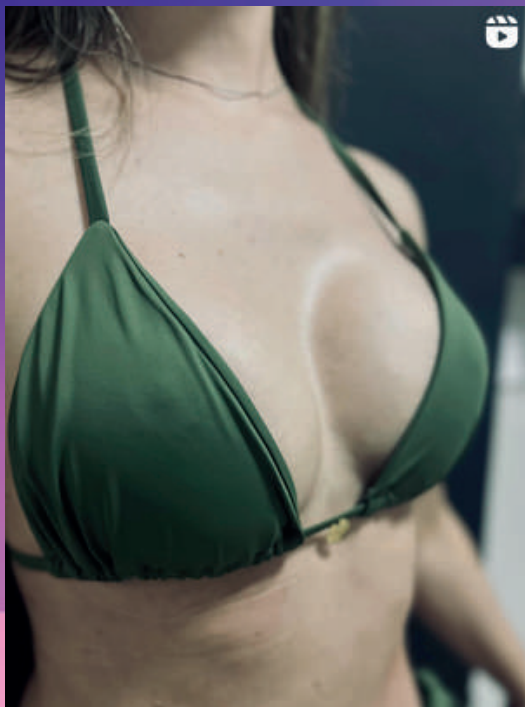

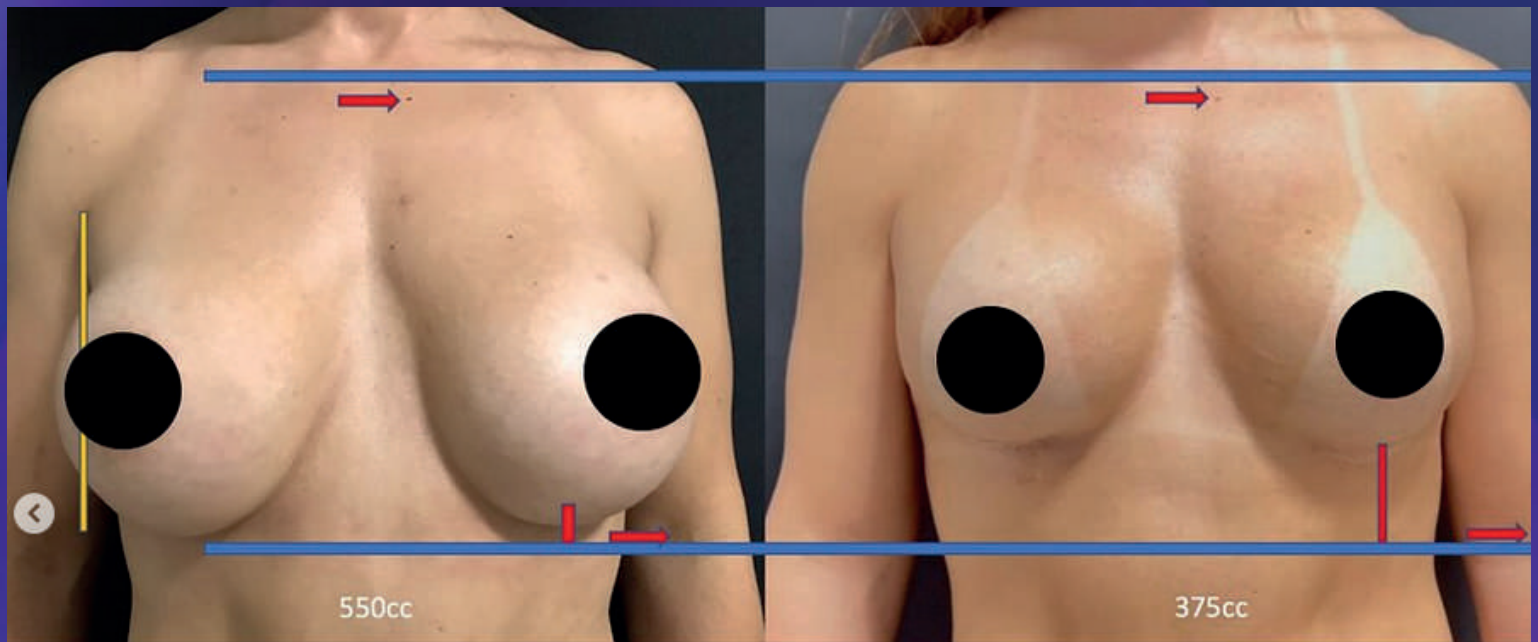

This is not just training
it's a **VIP A Two-Day Immersive Experience**

Focus: Multiplanar Mastopexy with L-Scar

The Multiplanar Mastopexy with L-shaped scar is a groundbreaking surgical technique designed to improve both aesthetic and functional outcomes in breast surgery.

Unlike traditional approaches, this method works across multiple anatomical layers — skin, glandular tissue, and muscle enabling a more precise, longer-lasting breast reshaping.

Special Sessions with Dr. Alfredo Hoyos

Gain exclusive access to the operating room of Dr. Alfredo Hoyos, creator of High-Definition Liposculpture (HD2 Lipo).

Observe and learn advanced body contouring techniques, including marking, execution, and surgical precision directly from the inventor himself.

Included in the Program

- Local transportation during the course days
- Gourmet meals provided throughout the two days
- Official Total Definer Breast certification

Not Included

Accommodation is not included, but we have partnered with a nearby hotel to provide our guests with exclusive rates and full assistance for booking and logistics.

Please note:
Airfare is not included in the program.

FACULTY

Let's reshape the future of breast surgery
one transformation at a time.

With every patient, every incision,
and every technique refined,
we're building a new era in aesthetic excellence and surgical precision.
