

JORJI

LIPEDEMA

**DESERVES ARTISTRY,
NOT JUST SURGERY.**

This course is not just
about treating lipedema
it's about redefining
what's possible for patients
who've been misunderstood
and underserved.

BOGOTÁ

LOCATION:
BOGOTÁ, COLOMBIA

DATES:
AUGUST 28 & 29

This exclusive 2-day immersive experience brings together two of the world's most influential minds in body contouring: Dr. Alfredo Hoyos, creator of High-Definition Liposculpture, and Dr. Jafar Jorjani, one of Europe's leading experts in lipedema surgery.

Nature is full of inspiration, containing the most amazing shapes and colours. And each and every human body is also perfect, interesting and loveable in its own way – with or without “blemishes”. Asymmetries and irregularities lend us our unique and distinctive characters. Sometimes you like these irregularities. Sometimes you don’t. If you don’t like your own irregularities, you no longer have to simply put up with them. Together, they unveil the perfect synergy between medical necessity and aesthetic excellence, transforming how lipedema is treated with both scientific precision and artistic refinement.

Jafar Jorjani, MD

High-Definition Liposculpture is not just about sculpting the body it's about understanding it at a deeper level. Lipedema is a condition that goes far beyond aesthetics; it carries pain, frustration, and often years of misdiagnosis. As surgeons, we have the responsibility to bring relief, restore harmony, and elevate the quality of life for these patients. This course is where artistry meets science—where anatomy becomes our map, and empathy becomes our guide. It's time to redefine what it means to treat and transform."

Alfredo Hoyos MD

IN THIS ELITE TRAINING, YOU'LL LEARN:

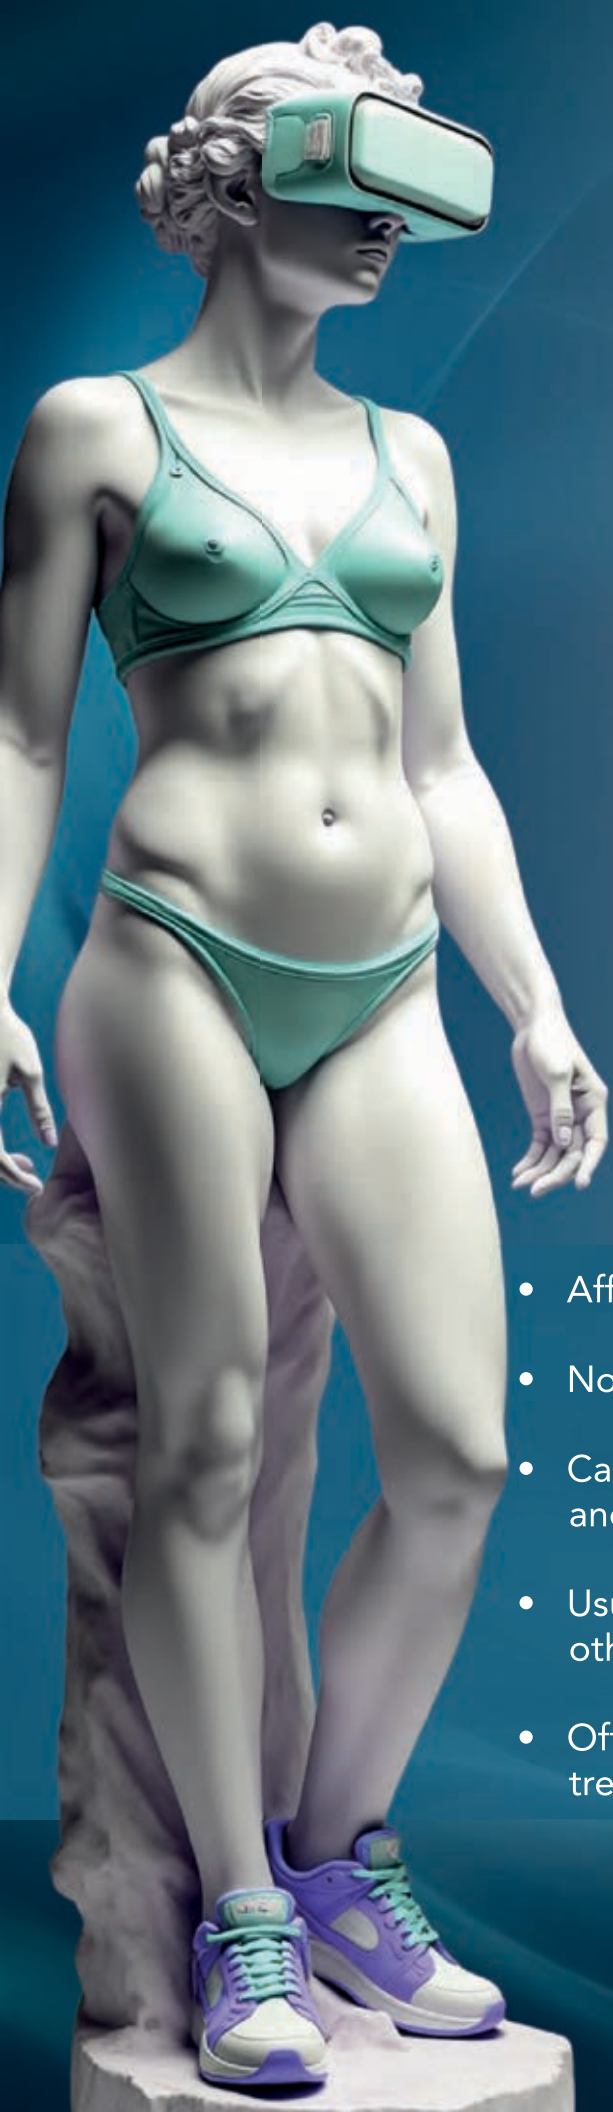

- Accurate diagnosis and classification of lipedema stages
- Key differences between cosmetic and reconstructive approaches
- The Total Definer methodology for treating lipedema patients safely and effectively
- Surgical strategies for preserving lymphatic and vascular integrity
- Integration of HD Lipo in complex lipedema cases to achieve functional and visual improvement
- Hands-on mentorship from both masters

WHAT IS LIPOEDEMA?

Lipoedema is a chronic, painful condition—mainly affecting women that causes abnormal fat buildup, typically in the legs, arms, and torso. It often begins at puberty but can appear at other stages of life.

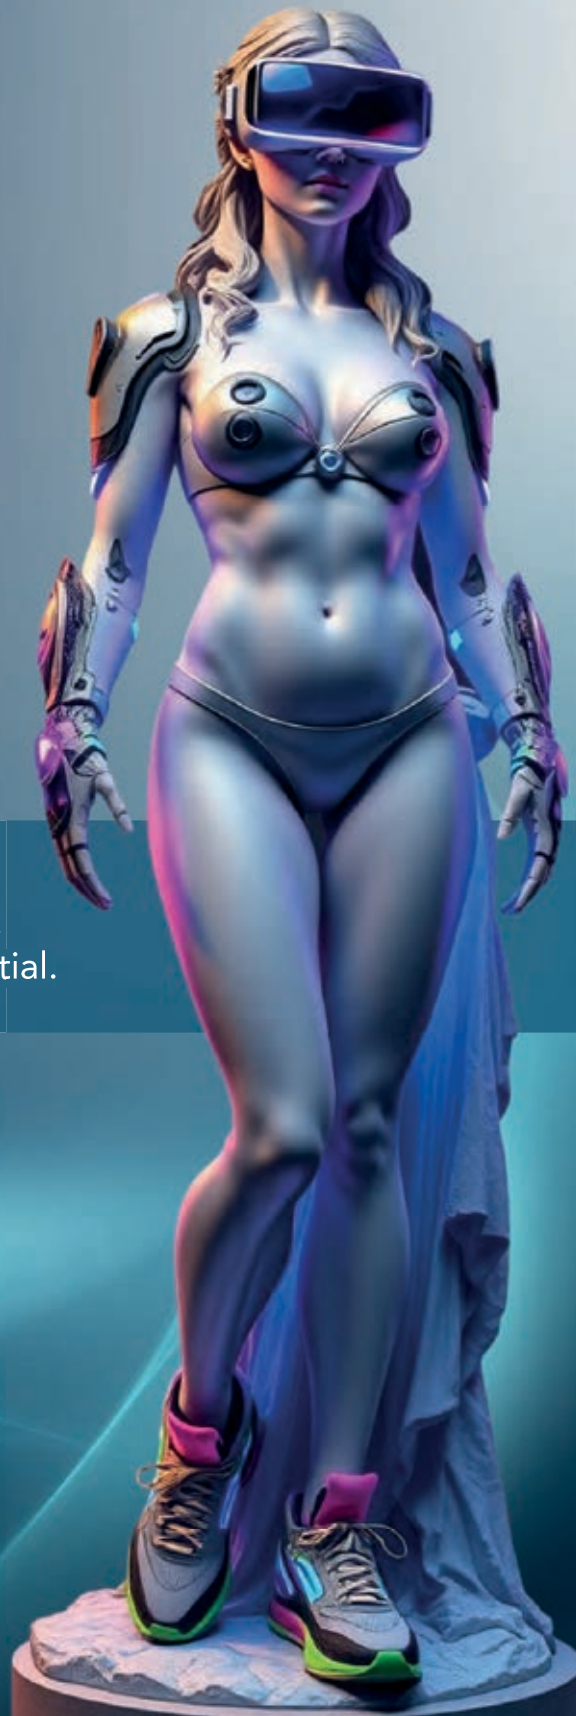

KEY FACTS:

- Affects up to 10% of women, though likely underdiagnosed.
- Not related to body weight or lifestyle.
- Causes symmetrical swelling, pain (especially later in the day), and visible leg edema after standing or sitting long periods.
- Usually stops at the ankles, distinguishing it from other conditions.
- Often confused with lipohypertrophy, which has similar treatment but without pain.

SYSTEMIC & MISUNDERSTOOD:

Lipoedema is more than cosmetic
it's a systemic condition with a strong genetic component.
Diagnosis can be difficult, making expert evaluation essential.

WHY TAKE THIS COURSE?

- **Address an Underserved Condition**

Lipoedema affects millions but few surgeons know how to diagnose and treat it properly. With rising awareness, patients are actively seeking specialists who understand their unique needs.

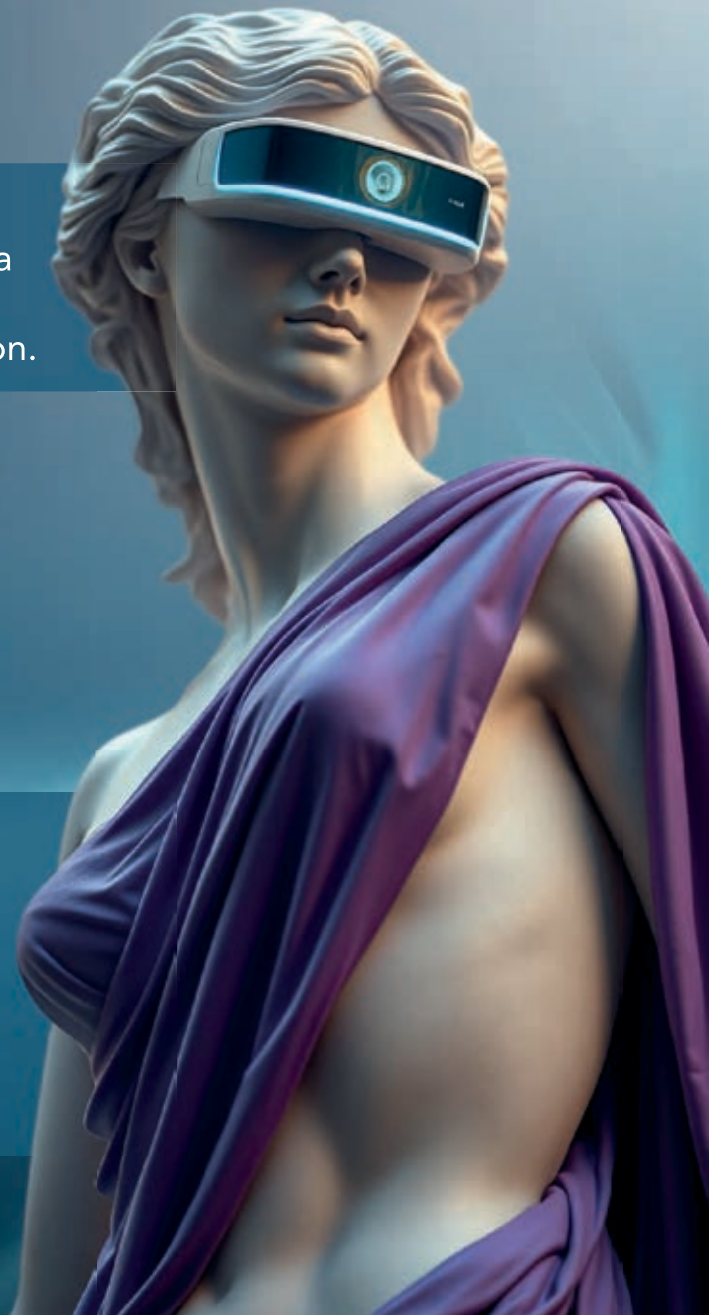

- **Combine Medical Insight with Artistic Precision**

Learn how to merge HD liposculpture mastery with the specific protocols required to treat lipedema safely and effectively. This isn't just surgery it's precision body contouring for a complex condition.

- **Be a Global Reference in Lipoedema Surgery**

Position yourself as one of the few plastic surgeons trained in cutting-edge lipedema techniques, led by two international leaders:

Dr. Alfredo Hoyos (Colombia)
& Dr. Jafar Jorjani (Germany).

- **Hands-On Skills
That Transform Practices**

Master techniques that elevate your results and open new revenue streams. This is more than a course—it's a strategic upgrade to your surgical offering.

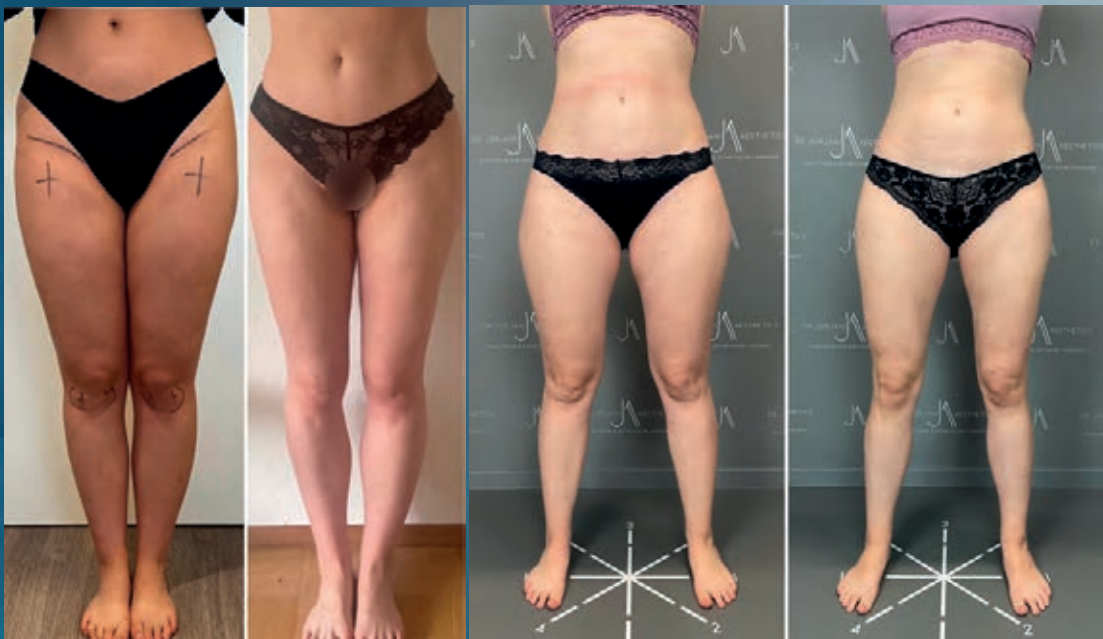

- **Science Meets Aesthetics**

Understand the pathophysiology of lipedema and how to customize your approach with anatomical intelligence and safety in mind.

- **Patients Are Waiting**

The demand is real. Patients are desperate for qualified experts. This course will help you become the go-to name in your city—or your country
