

TOTAL FACE

THE FOUNDING EDITION

**Ready to Learn Deep Plane Facelift,
Neck Lift, and Endoscopic Brow Lift ...
Live, Directly From the Surgeon
Who Created Them?**

For the first time, **Dr. Süleyman Taş**
opens his signature facial protocols
to a Founding Cohort of surgeons
live, hands-on, direct.

DECEMBER 3–4, 2026
BOGOTÁ, COLOMBIA.

By the institution that has trained 2,000+ surgeons across 60+ countries.

THE OPPORTUNITY

A Founding Moment in Facial Surgery Education

TOTAL FACE is a world-class educational experience where science, precision, and aesthetics converge. It delivers advanced medical education in facial plastic surgery, facial rejuvenation, and cutting-edge aesthetic procedures, empowering surgeons with the techniques, technologies, and clinical judgment to elevate patient outcomes.

This December, **Bogotá** hosts the first-ever edition of **TOTAL FACE**. There is no prior class, no returning alumni to compare notes with only the surgeons who choose to be first.

Founding Cohort Status

Every surgeon who trains in this inaugural edition becomes part of a distinction that cannot be recreated: the Founding Cohort of **TOTAL FACE**. Every future edition will look back on this one and on the surgeons who were in the room.

Who This Is For

This training is built for board-certified plastic surgeons ready to operate at the level of the world's leading facial surgeons. It is not an introductory course, and it is not designed for surgeons unwilling to be challenged in front of their peers.

Why This Training

— Protocols you won't find in any textbook.

Dr. Taş's signature deep plane facelift, neck lift, and endoscopic brow lift techniques are taught live, directly from the surgeon who created them, not through a manual, a recorded course, or an assistant.

— You learn judgment, not just technique.

Live surgery exposes the decision-making behind patient selection, complication prevention, and real-time adjustment, the layer of expertise no textbook or lecture hall can teach.

— A small cohort means direct access.

This is not a congress of thousands watching from a screen. Hands-on proximity to faculty is built into the format by design, not offered as an upgrade.

A close-up of a person's face, focusing on the eye and cheek area. The skin is smooth and has a slight sheen. Overlaid on the face and background is a digital network of white dots connected by thin lines, resembling a molecular or neural structure. In the upper right corner, there is a faint, stylized chemical structure of a cross-like molecule. The background is a deep purple with soft, out-of-focus light spots.

— Immediate clinical application.

Every protocol taught is one the faculty is using in their own practice this week. You return to your clinic ready to operate differently on Monday.

— A competitive edge in your market.

Advanced, signature facial techniques differentiate your practice, support premium positioning, and open referral relationships with peers who recognize world-class training when they see it.

— Founding Cohort credibility.

Training in the first-ever edition of TOTAL FACE places you among the earliest surgeons trained under Dr. Taş's protocols worldwide, a distinction that exists exactly once.

What You'll Master

01 Master Advanced Facial Rejuvenation Surgery

Learn the latest techniques in facelift, neck lift, eyelid surgery, and facial contouring for natural, long-lasting results.

02 Develop Expert Facial Analysis & Surgical Planning

Master patient evaluation, facial harmony, anatomy, and personalized surgical decision-making for predictable outcomes.

03 Learn Dr. Süleyman Taş's Signature Techniques

Discover the protocols, refined surgical maneuvers, and innovative approaches developed through thousands of facial procedures and years of academic research.

04 Achieve Excellence Through Live Surgery

Observe every critical step — from patient selection to complication prevention and postoperative management — directly from one of the world's leading facial plastic surgeons.

Faculty

Dr. Süleyman Taş

World-Renowned Facial Plastic Surgeon · @drsuleymantas

— Specialist in Deep Plane
Facelift & Neck Rejuvenation.

— Creator of The Fat Codes® and 7 Neck®.

— International Lecturer in
Facial Aesthetic Surgery.

— Board-Certified Plastic Surgeon
practicing in Ecuador.

TWO DAYS. HANDS-ON EXPERIENCE.

The Program

Day 1

Live High-Precision Facial Definition Cases

In-depth patient selection analysis, surgical planning, and clinical decision-making throughout every procedure.

Day 2

Combined Facial Rejuvenation Procedures

Featuring the exact protocols, techniques, and treatment algorithms used daily by our world-renowned faculty in their own clinical practice.

“You leave with the protocol in your hands — not a certificate in a drawer.”

Venue

Bogotá — Where Aesthetic Innovation Was Born

Bogotá is not a backdrop for TOTAL FACE it is its origin. This is the city where High-Definition Liposculpture was created, and where Total Definer has trained surgeons from 60+ countries since 2018. Andean light, colonial architecture reborn as world-class galleries, and a culinary scene ranked among Latin America's finest — Bogotá offers delegates a destination as considered and precise as the techniques they'll leave with.

Beyond the Operating Room

Two intensive days deserve a city that matches the intensity. Walk La Candelaria's colonial streets, ride the cable car to Monserrate for panoramic views across the capital, take in world-class art at the Museo Botero, and close each evening in Zona T or Parque de la 93. Bogotá's most celebrated restaurants and rooftop bars. TOTAL FACE trains the hands. Bogotá takes care of the rest.

A close-up, profile view of a woman's face, looking towards the right. Her eyes are closed. Overlaid on her face is a glowing, digital grid pattern with small, bright dots at the intersections, resembling a facial mapping or scanning interface. The background is a solid, deep blue.

LIMITED SEATS

Secure Your Seat

TOTAL FACE is capped by design.
Hands-on access to live surgery
requires a small cohort

DECEMBER 3–4, 2026
